

BOARD CLICK

Introduction:

Board Click is an MVP stage startup from Cyberport working on the “**Google**” of digital outdoor advertising. We are a team with diverse backgrounds from investment banking, marketing, and AI who are ambitious to revolutionize this century-old business.

We are excited to expand our team and look for a full-stack software engineer to join us for **full-time** and embark on this challenging journey!

Role Description:

You will be working closely with the founder on prototyping and developing AI-driven web applications / platform, but also expected to work independently and take our platform to the next level.

Tech Qualification:

- Graduated from Computer Science, Software Engineering or similar disciplines
- Experienced in conducting technology research / analysis and laying out technical specifications
- Experienced in full-stack web application development using React.js and Python
- Knowledge of relational database such as MySQL / PostgreSQL

Soft Qualification:

- Team player with strong communication skills
- Self-initiator with strong problem-solving skills
- Love challenges / new ideas and ready to learn / break / make new things

Benefit:

- Attractive package negotiable based on experience (equity subject to discussions)
- 14-day annual leave
- Flexible working hours & remote working possible
- Have a huge impact on company development as an early member
- Potential to be CTO

Email CV to brian.chen@boardclick.ai / tech@boardclick.ai, if you want to take on challenges and utilize your exceptional talents and creativity!
